# Natural and working lands outreach: **Methods**

# Natural and working lands outreach: Discussion topics

# Topic 1: Goal setting and indicators of success

---

- Implement goals, policies and approaches that are:
  - well informed
  - science based
  - adaptable

# Topic 1 (continued): Goal setting and indicators of success

---

- Adaptable by:
  - Sector
  - Location
  - Land type
  - Acreage
  - Activity
  - Landowner needs
- Co benefits
- Align with other state, tribal and federal targets

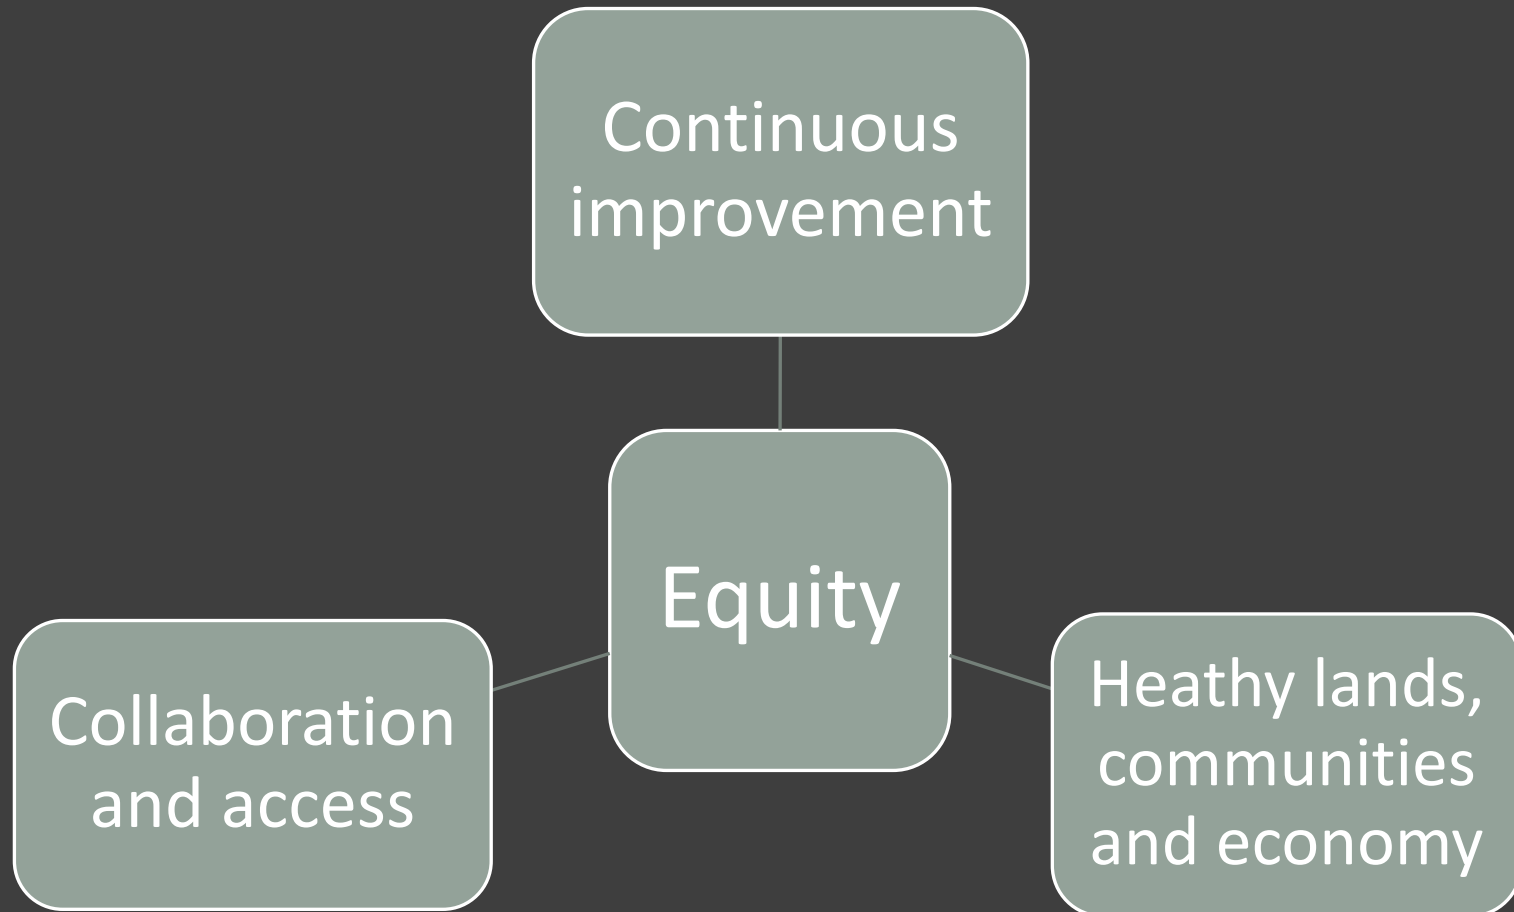

*“...develop area-specific recommendations of best practices for landowners”*

*“Consider working with state and federal agencies to change their policies in order to align with what these goals are.”*

*~ Targeted Survey responses*

# Topic 1 (continued): Goal setting and indicators of success

---

*“Better connecting, strengthening and investing in systems of research, education, and regulation that work together to listen, understand, and respond to the needs of stakeholders.”*

*“All policies should include the same values, treat everyone equitably”*

*~ Focused discussion participants*

# Topic 2: Engaging Oregonians (people and process)

---

- Promote collaboration and communication
- Increase trust and buy-in
- Focus on tribal engagement
- Use an equity lens throughout
- Balance impacts on landowners

# Topic 3: How do we get there?

---

- Provide financial incentives
- Technical assistance and education
- Recognize and reward good practices
- Balance regulatory needs with a market-based approach\*\*
- Identify and protect/restore carbon stocks on high potential lands
- Protect working lands
- Enhance soil health

# Natural and working lands outreach: Next steps

---

- June 4<sup>th</sup> meeting:
  - Finalize goals
  - Recommendations for how to get there
- Summarize information for final proposal
