

MEMORANDUM

To: Oregon Global Warming Commission

From: Cathy Macdonald, OGWC Chair
Alan Zelenka, Assistant Director for P&I
Zachariah Baker, Senior Climate Policy Analyst

Date: December 8, 2022

Re: Updated Roadmap Schedule

The action scoring is taking longer than anticipated. As a result, Staff was not able to post the evaluation scoring results and related recommendations on December 5, 2022, as originally planned. Staff still expects to be able to present the scoring results at the December meeting. But, to accommodate review of the scoring results and related recommendations, we propose providing an opportunity for written comment on the scoring results and related recommendations beyond the December meeting – through January 5, 2023. In addition, we propose adding a second Commission meeting in early 2023. We would use the planned mid-January meeting for further discussion of the scoring results and related recommendations and use the second meeting to finalize the Roadmap recommendations.

A revised schedule reflecting these changes follows for discussion at the December meeting:

Next Steps	Date
Commission Meeting to discuss draft recommendation follow-up and present action scoring results	December 16
Written comments due on the action scoring results and related recommendations	January 5
Post updated draft recommendations to-date	January 9
Commission Meeting to continue discussion of action scoring results and related recommendations	January 12-13 (Exact date TBD)
Final written comments due on draft recommendations	January 23
Commission Meeting to finalize recommendations	January 30-February 3 (Exact date TBD)
Commission Subcommittee final review of report	February 13-17
<i>Roadmap to 2035</i> published and delivered to Legislature	By March 1
